Advice to Mothers
Have you had baby's photograph taken?
It's an art to take baby's photograph as it should be taken. To catch his regular little smile, his pretty little dimples. Such photographs become prized remembrances of babyhood's days in years to come. We have had years of experience in photographing children. They always look their best when we take them. No troublesome posing. Snap them in a jiffy.

VERY LIGHT TRADING.
Crop Reports and Foreign Developments Have Depressing Influence.

New York, Aug. 1.—Unfavorable crop reports, a statement of a Standard Oil magazine and the massing of British troops at Aldershot were among the incidents employed as pretexts for depressing the stock market today. Regarding the first named, the most discouraging news came from Iowa, where a 30 per cent. damage to corn was reported. This was a striking distinction, however, to cotton, in which a percentage condition for July of 86.3 as against 44.8 last year was reported in all probability no attention would have been paid to the reported concentration of the British troops but for the fact that the consols declined sharply in London, where Americans were the only securities that manifested any degree of strength. Prices were heavy on the Paris bourse and domestic shares were dull and weak in Berlin.

Trading in the local market fell to slender proportions soon after the first hour. The opening was irregular, and by noon losses of a point were registered. The New York Central, however, and several of the specialties, with a two-point decline in Canadian Pacific, which rumor ascribed to selling by the Erie. The Erie, however, lower prices were recorded, all active issues declining under the influence of a number of unattractive railroad reports.

These included Union Pacific and Southern Pacific, with net losses for July of \$23,000 and \$24,000 respectively, while for the fiscal year Union Pacific's revenues decreased \$4,300,000 and those of Southern Pacific \$4,472,000.

Aitchison for June fell over \$500,000 net, but its revenues for the year increased \$1,565,000. The Pennsylvania and New York Central line submitted earnings for June, the figures of the latter system being the more favorable. The Central gained \$2,388,000 over the preceding fiscal year, and Missouri, Kansas and Texas scored a net increase of over \$1,000,000.

Copper prices were lower in sympathy with the general market, although exports of the metal for July were almost 12,000 tons in excess of those for the same month last year.

The monthly bulletin of a prominent national bank which sometimes reflects the views of high finance deals largely with politics. In the opinion of this institution general interest in the special session of congress has almost ceased. The bulletin refers to this country's large foreign trade and dwells on the outlook for our manufactured exports, which, it adds, are in the current fiscal year.

On the other hand, Standard Oil lost fifteen points, selling down to 440.

Almost the one feature of the money market was the hardening of rates for commercial paper. This betokens a revival of trade in various lines, particularly in metals.

The bond market was lower, with further weakness in American Tobacco issues. Total sales, par value, were \$1,687,000. United States bonds declined 1-8 per cent. on call.

OAKES PLAYS SHORT OUTFIELD.
Cardinals' Center Gardener Gives Reasons for Staying in Close.

Rebel Oakes of the Cardinals is playing the short outfield of any middle gardener in major league baseball. The Cardinal center fielder has some excellent reasons for playing in close. He says: "I've accepted more chances than any other center fielder in the game this year. The fielding averages will prove it. I expect to close the season with a record of having accepted over 100 more chances than any other outfielder in the game. I get them by laying in close to the shortstop and second baseman. Of course, I don't play every batsman alike. I know the long hitters and I know the balls they are going to hit. A hard-hitting right-handed batsman figures to pull the ball to deep left if he gets a good grip on it, and a hard-hitting left-handed batsman will pull it hard to the right. If he meets the ball on the seam, few batsmen smash the ball hard to the middle field. They either hit to right center or left center."

"My idea is to pull the left and right fielders away from the foul lines and have them work in close to the right center. That gives the middle man a chance to get the liners and Texas leaguers in short center. I've nailed a whole bunch of them this year. Bresnahan will tell you that it's the right kind of a ball. Once in a great while some batter will fool me and knock the ball over my head. I never happens with a pitcher like Sallee or Harmon in the box. They have control and signal the men before they are going to stick it, and then turn in and place the ball there. Jimmy Sheppard of Chicago is my idea of a good ball going to the right center. He knows what he is doing and generally know in what direction the batsman will drive it if he is lucky enough to connect with the sphere. That's one of the principal reasons why Sal and Harmon have been so successful this year. Harmon has got so he can tell us in advance where he is going to stick it, and then turn in and place the ball there. Jimmy Sheppard of Chicago is my idea of a good ball going to the right center.
